

WFRGENT NV offers high quality expertise in the field of fire investigation. Very specific and complex fire research is performed by experts who can rely on years of experience and thorough knowledge of the subject. WFRGENT NV supports among others forensic experts and authorities.

Such investigation is often based on reconstructions and/or on FSE (Fire Safety Engineering) approaches.

In cooperation with the University of Ghent, WFRGENT NV performs experimental research that supports the CFD (Computational Fluid Dynamics) calculations performed at the University of Ghent. For more information concerning these CFD calculations:
