

Under the brand name FIRE, WFRGENT NV supplies [fire testing equipment](#) for standardized fire tests. F.I.R.E. stands for Fire Instrumentation and Research Equipment and offers a complete range of testing equipment related to fire investigation:

- Heat Release Rates
- Smoke measurement (laser / white light)
- Oxygen Index
- Calorific potential
- Critical flux
- Toxicity
- Smoke leakage through doors
- ...

The equipments are destined both for Reaction and Resistance to Fire tests:

- Equipment and instrumentation described in the Euroclasses or according to the Maritime or Transport legislations
- Fire Resistance furnaces: vertical, horizontal, smoke leakage
- Experimental test set-ups

FIRE can boast years of practical experience within and continuous follow-up of the latest technologies and the relevant legislations.
